British Willow

Musgrove Willows is a family run company in Somerset, where the willow is grown, harvested, naturally stained (where needed) and then hand woven by their team of expert weavers.

You are able to design your own bespoke coffin online and go to the willow farm to help weave it if you wish. They can even weave in a favourite scarf or other material into the coffin.

These are in our opinion the most environmentally friendly and bespoke coffins we can offer, and even better they are a small family run business too!
